

## ONE GLOBAL VOICE SOLUTION

### Flexible, scalable connectivity supporting local requirements

Together, Horizon Telecom and Equinix make global connectivity flexible and scalable by delivering tomorrow's end-to-end voice innovations today.

Acting as your neutral and trusted advisor, we minimize complexity and ensure ease of business with just one contract, one invoice and one point of contact. Carrier and cloud neutral, our global reach and expertise delivers agile solutions for global VOIP (SIP) and global cloud UC.

### The challenges you face

#### Sourcing the right solution

How can you find a single voice solution that encompasses different legislations and local country requirements (including emergency and local telephone numbers); harmonizes PBXs, license models and contracts; delivers global scale; integrates Skype for Business and Teams; ensures consistent voice uptime; and provides clear visibility of spend and infrastructure?

#### ISDN phasing out

As telcos phase out ISDN around the world, replacing legacy voice services raises critical questions. Where do you start and what are the risks? How should you manage the different deadlines per country? Who can support you globally, avoiding the complexities of country-by-country migration? How can you ensure your solution is future-proofed?

We solve all connectivity and global voice challenges worldwide

### The key benefits of our solution

#### Reduced complexity and costs

Giving you more control and visibility with less complexity and costs, we are the global partner who takes care of all your local, country-specific requirements.

#### Tailored enterprise cloud communications

Supporting the growth of your digital business, our globally integrated and managed communication solutions connect you directly, securely and dynamically to cloud and voice providers.

#### Neutrality with global reach

Both Horizon Telecom and Equinix are vendor agnostic, giving you access to over 1,800 network and 2,900 cloud and IT providers globally.

#### Proven global voice methodology

Horizon Telecom's Phased Voice Program equips you with a step-by-step, proven, predictable and risk-mitigated migration of legacy voice systems to a future-proofed global VOIP platform.

## Our leading capabilities enable your success

### Global voice and cloud UC

Our Carrier Neutral Phased Program approach guides you to a future-ready platform, using both global and regional voice carriers. This consists of Enterprise Global SIP, Skype for Business and Teams Connectivity or true Global Cloud Unified Communication (Cloud UC), combined with voice, video, messaging, collaboration and contact center solutions.

### Global connectivity services

We are committed to delivering the best voice and data solutions, tailored to your global business requirements. Combining leading industry expertise and experience, we are carrier neutral and can connect you anywhere, to any location, with any carrier/operator worldwide.

### Interconnected data centers with global reach

Equinix data center services safeguard mission-critical data with the highest levels of security and operational reliability. Delivering industry-leading >99.9999% availability, Equinix's eight data centers in the Amsterdam metro and 200 data centers globally, provide access to vital ecosystems where major networks, enterprises and business partners interconnect.

### Equinix Cloud Exchange Fabric™

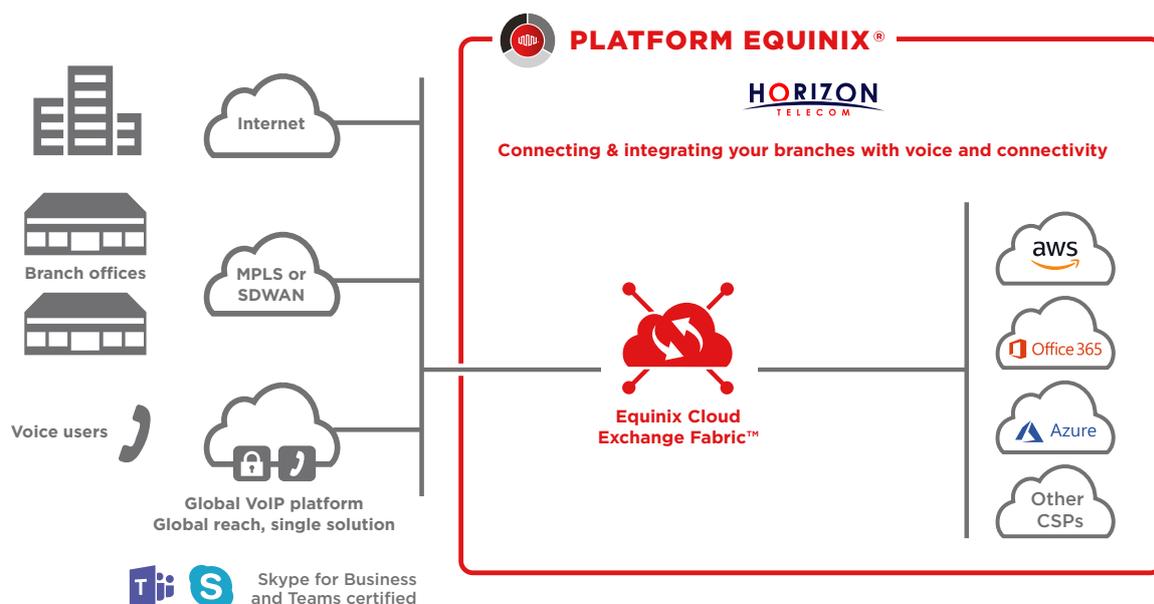

Equinix Cloud Exchange Fabric™ (ECX Fabric) directly, securely and dynamically connects distributed infrastructure and digital ecosystems on Platform Equinix® via global, software-defined interconnection. Available across 35+ locations, ECX Fabric is designed for scalability, agility and connectivity over a self-service portal or API. Through a single port, discover and reach anyone on demand, locally or across metros.

### About Equinix

Equinix connects the world's leading businesses to their customers, employees and partners inside the most interconnected data centers. In 52 markets across five continents, Equinix is where companies come together to realise new opportunities and accelerate their business, IT and cloud strategies. We operate the only global interconnection platform, sparking new opportunities that are only possible when companies come together.

### About Horizon Telecom

Delivering global, carrier-neutral and future-proofed connectivity, Horizon Telecom creates bespoke customer-driven solutions that fulfil specific needs by combining multiple techniques and networks. Our infrastructure enables us to integrate global solutions into a single seamless service, completely customized to your business requirements.
